

Inspector Hogarth and Constable Sprout have made some bird feeders at Horticulture HQ. They wondered if you could give it a go!!

Bird Feeder

- 1. Decide how long you would like your bird garland to be and cut a length of strong thread or twine to size (with a parent/ Guardian).**
- 2. Thread a strong needle with your twine. If you're working with younger children we recommend using a blunt safety needle or pre-cutting holes into slices of fruit so they can be threaded by hand.**
- 3. Tie a knot in your twine at the opposite end to the needle.**
- 4. Push the needle through each piece of fruit and tread it onto the twine. Why not use your fruit to make a pretty pattern?**

Inspector Hogarth and Constable Sprout Helpful Tips:

- Make sure to check all of the feed you're using is safe for birds and wildlife to consume. If you have pets, make sure to keep your garland out of their reach.**
- Once the birds have enjoyed their tasty garland, any leftovers can be put in the compost bin and if you have used a compostable twine it can also be added.**
- Be sure to remove any fruit that starts to look mouldy from your garland to prevent any harm to birds, pets or other wildlife.**
